Targeted Cryotherapy

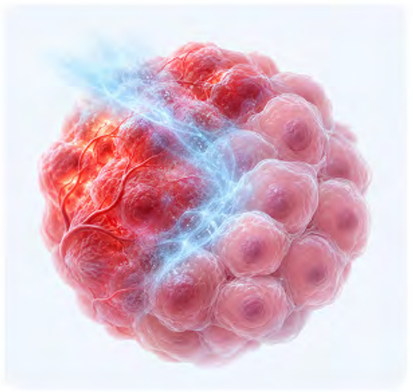

Iceberg 25L delivers localized cryotherapy to support pain relief, reduce inflammation, and aid muscle recovery and rehabilitation. Its cooling effects may provide pain relief for up to 3–4 days.

The device also supports facial rejuvenation, helping reduce the appearance of fine lines, wrinkles, and swelling. Suitable for sports recovery, wellness, and aesthetic treatments, Iceberg 25L offers versatile cryotherapy for the face and body.

Benefits of Iceberg Cryostimulation

Pain Relief

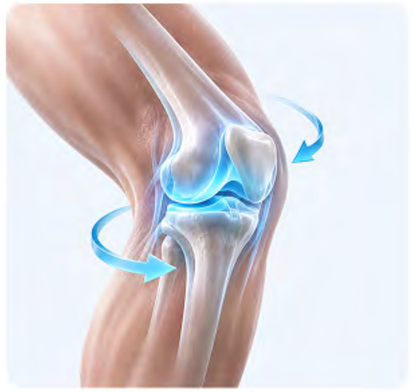

Inflammation Reduction

Swelling Reduction

Muscle Relaxation

Improved Joint Mobility

Faster Recovery

Reduced Muscle Fatigue

Improved Blood Circulation

The Thermal Imaging handle

The Iceberg 25L localized cryotherapy machine offers an optional thermal imaging handle with a built-in screen that monitors skin temperature during treatment.

screen that monitors skin temperature during treatment. Equipped with an optical camera, temperature detector, signal processor, and HD display, the handle converts infrared radiation into real-time thermal images.

The display uses different colors to visualize temperature changes, helping operators monitor cooling intensity and ensure safer, more controlled cryotherapy sessions.

Thermal Imaging Specifications

- IR Image Resolution: 60 × 60 pixels (3,600 pixels)
- Thermal Sensitivity: 0.15°C
- Temperature Range: −20°C to +300°C
- Temperature Accuracy: ±2°C or ±2%
- Display: 2.4″ HD
- Visible Image Resolution: 0.3 MP
- Image Capture Frequency: 6 Hz

Advanced Control

The machine is controlled by a remote control, located on the handle, and has a large sensor panel with a LED display showing it's processing parameters. The flow force is regulated smoothly, and measures the appropriate parameters around the treatment area. There are 4 levels of outgoing cooling flow force that regulates the cryostimulation of one's skin in the best possible way. There is no other cryo facial device on the market quite like the Iceberg, with such strong functionality at a reasonable price.

Technical specification

Lenght	720mm/ 28”
Width	570mm/22”
Height	1390mm/55”
Weight	150kg/330LB
Gross weight with packing crate	200kg/450LB
Energy consumption	2.5kW up to 20A
Temperature range on program	Targeted nitrogen vapor up to -160C/-256F
Nitrogen consumption	1-2kg per session
Power supply	220V/50Hz or 110V/60Hz
Nitrogen tank capacity	25L
Options	Thermal imaging handle
Portable on wheels

Smart Control & Safety Features

- Emergency Stop Button
- Low Nitrogen Level Alert
- Automatic & Adjustable Manual Programs
- 4 Cryostimulation Power Levels
- Handle & Touchscreen Controls
- LED Treatment Distance Indicator
- Multilingual Interface
- Built-in Wheels for Easy Mobility
- Flexible Hose up to 1.5 m
- Customizable Equipment Branding

LOCALIZED CRYOTHERAPY

Iceberg 25L

Iceberg 25L is an advanced localized cryotherapy device designed to support pain relief, inflammation reduction, muscle recovery, rehabilitation, and skin rejuvenation through targeted nitrogen-powered cold therapy.
