# FEATURES

## ZERO GRAVITY VACUUM TECHNOLOGY

InfraStar creates negative vacuum resistance via suck out all air from capsule. Vacuum resistance is one of the most effective methods for cellulite reduction and get rid of problematic body areas. Also vacuum resistance helps to improve blood and lymphatic circulation in problematic body area which improves recovery in sport rehabilitation process.

## INFRARED LIGHTS CELLS REJUVENATION

The infrared light therapy and the vacuum resistance therapy improves the oxygen supply of the cells, intensifies their metabolism, helps the regeneration of the skin, muscles and boost lymphatic system. Infrared lamps heating body which significantly increase sweating and remove residual water and toxins from body.

## CRYOTHERAPY RECOVERY EXERCISES

Unique exercise bike which combine hot and cold temperature exercises for incredible recovery results. CryoNick Technologa incorporated in this bike gives availability to exercise in extremely cold temperature. Temperature difference during exercise brings fast recovery result in injured area. Especially effective for sport rehabilitation and physical therapy purposes

## COLLAGEN LIGHTS

Red lights therapy is well-know skin care technology for anti aging and improve skin condition. Red light stimulates natural collagen production on skin level. Extra skin care benefits during InfraStar exercise

## OZONE THERAPY
