Presentation

About the product

The InfraStar Sole exercise bike combines innovative and exclusive technologies such as deep vacuum resistance, infrared heating, cryotherapy, pure oxygen breathing, collagen light, and aromatherapy — all in a single machine.

It was developed for fat reduction workouts, conditioning and rehabilitation processes.

A complete and effective solution for recovery, physical remodeling and weight reduction.

What Makes InfraStar Sole Unique

Six technologies. One integrated system.

InfraStar Sole combines advanced fitness and wellness technologies into a single, powerful solution.

Vacuum Technology

Zero gravity effect reduces cellulite, improves blood and lymphatic circulation, accelerates recovery.

Infrared Light

Improves oxygen delivery, increases cellular metabolism, stimulates regeneration.

Cryotherapy

Cryonick system enables low temperature training for faster rehabilitation.

Collagen Light

Stimulates natural collagen production and improves skin quality.

Ozone Therapy

Helps skin regeneration and strengthens immunity.

Aromatherapy

Aromatic oils provide antibacterial effect and boost skin regeneration.

A New Generation of Training

Smarter movement. Better results.

Traditional Training

- ✕ High joint impact
- ✕ Slow visible results
- ✕ Lack of targeted body stimulation
- ✕ Not suitable for all fitness levels

The InfraStar Sole Approach

- ✓ Low-impact movement
- ✓ Vacuum-assisted training
- ✓ Thermal stimulation
- ✓ Fully adjustable to individual needs

The system adapts to different user levels and goals, providing a customized and safe experience for everyone.

Wellness
& SPA centers

Beauty and
aesthetic clinics

Fitness clubs and body
contouring studios

Private practices
and limited space facilities

System Structure & Components

Key elements of the InfraStar Sole system

10'1 virtual reality display with wifi, Facebook, Netflix, Spotify and TV

1.5kW powerful infrared heating lamp

Pedal resistance

Glass elements on sides and top

Shock absorbers for easy opening

- Pioneer speakers
- Collagen lamp
- LED lights
- Aromatherapy spray
- Oxygen breathing mask
- Luxury leather seat
- Powerful vacuum motor (up to 30mbae)
- Cryonick box (winter blowing up to -20C/4F)

5 neoprene skirts (S–XXL)

Vacuactivus app connection (PC&mobile)

Dimensions (cm)

Metric system

InfraStar Sole

Infrared Technology

The infrared system gently warms the body during training, helping to improve circulation and activate muscles more effectively.

Deep heat penetration supports metabolic processes, reduces stiffness, and enhances overall comfort.

Working together with movement and vacuum, infrared technology creates a smoother, more efficient, and more enjoyable training experience.

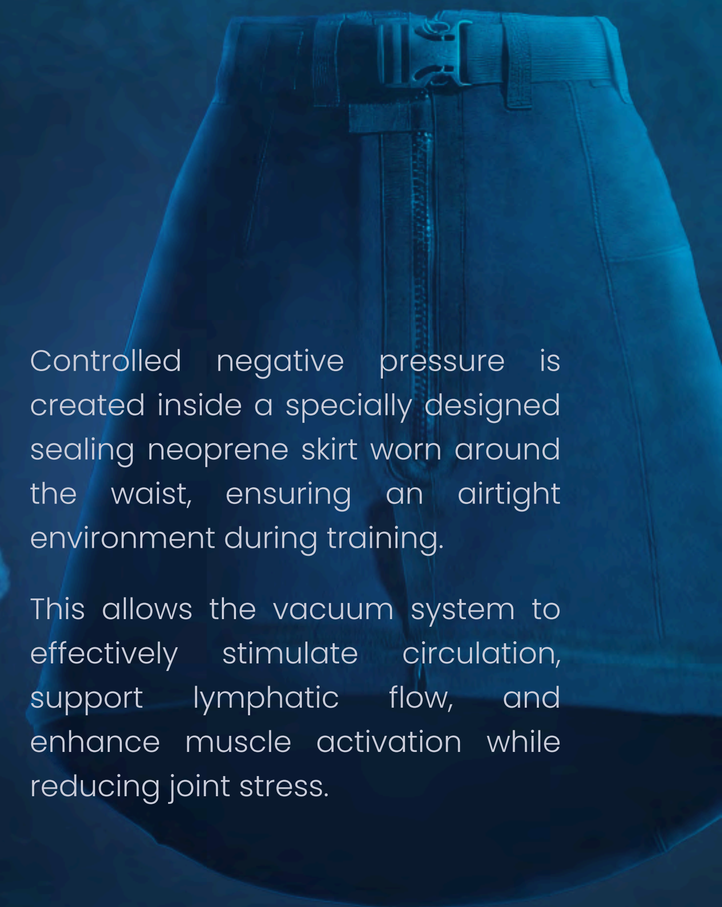

Cryo Technology

Cooling airflow helps refresh the body and support recovery during or after training.

It improves comfort, balances body temperature, and enhances the overall training experience.

Vacuum Technology

Controlled negative pressure is created inside a specially designed sealing neoprene skirt worn around the waist, ensuring an airtight environment during training.

This allows the vacuum system to effectively stimulate circulation, support lymphatic flow, and enhance muscle activation while reducing joint stress.

Sarah M.
Austin, TX

Each session helps me feel lighter, more energized, and more connected to my body.

With InfraStar Sole, I found a routine that fits naturally into my lifestyle and supports my body instead of pushing it too hard.

It's not just training — it's time I invest in myself.
