ICEBERG CRYONICK

ROLLER MINI

LOCALIZED CRYOTHERAPY

ICEBERG
CRYONICK ROLLER

MARKET NEEDS

Modern clients seek body contouring and skin improvement without surgical interventions.

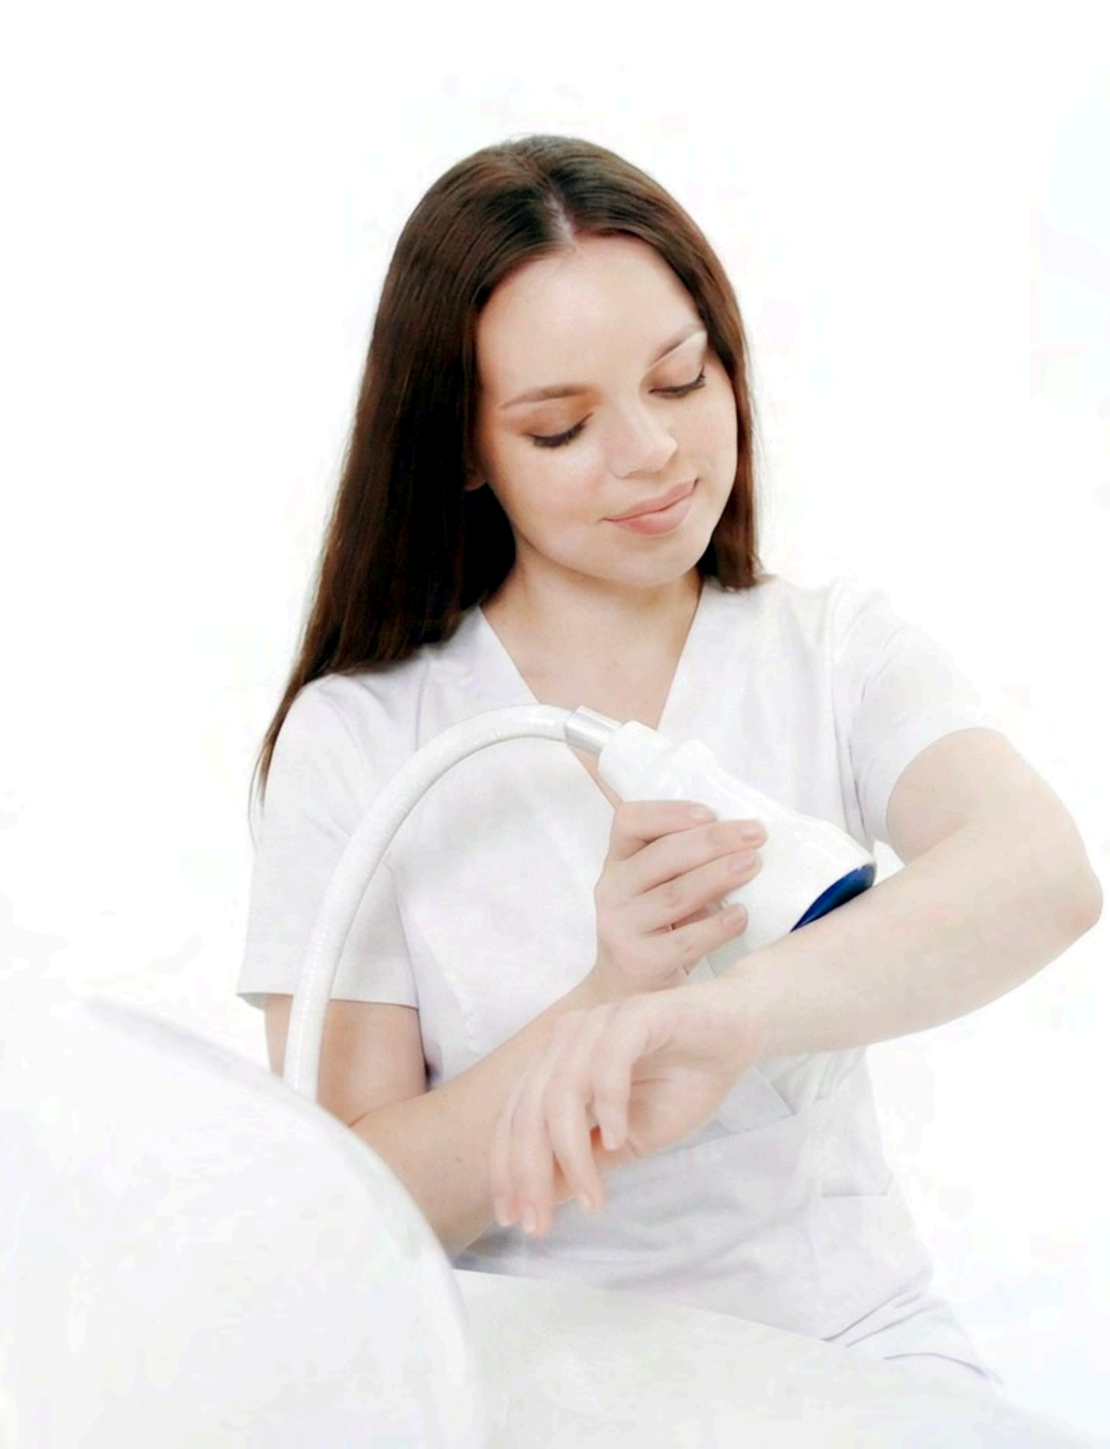

Many struggle with localized fat deposits, cellulite, and reduced skin firmness, which affects both confidence and overall well-being.

Traditional methods such as massage, fitness, or dieting often provide slow or insufficient results.

Professional salons and wellness centers are looking for effective, safe, and fast solutions that can deliver visible results after the first sessions.

Devices should be easy to operate, adaptable to different body areas, and provide a comfortable experience for clients.

PRESENTATION

ABOUT THE PRODUCT

Iceberg Cryonick Roller Mini is a compact cryotherapy device designed for effective body contouring, skin improvement, and muscle relaxation. It is suitable for professional use in beauty salons, spas, and wellness centers, offering advanced technology in a convenient format.

The device combines controlled cooling and heating with roller massage to stimulate circulation, support lymphatic drainage, reduce the appearance of cellulite, and improve skin firmness — all through a non-invasive and comfortable procedure.

TECHNOLOGY

CRYO AND HEAT THERAPY

Iceberg Cryonick Roller Mini combines cryotherapy, heating, and roller massage to stimulate skin and subcutaneous tissues.

Cold triggers fat breakdown and vessel contraction, while heat boosts circulation and lymphatic drainage.

The roller massage improves tissue elasticity and accelerates waste removal for enhanced results.

S L I M . F I R M . C O N T O U R .

SLIMMING & FAT LOSS

Results depend on lifestyle and diet. Visible changes appear from the first sessions, while lasting results require ongoing support. Maintenance sessions a few months after the initial treatment help preserve the outcome.

SKIN FIRMING

Cellulite reduction is visible after each session. Cryotherapy stimulates collagen production, breaking down cellulite while tightening the skin. Healthy habits help extend the results.

FACIAL CONTOURING

Results become visible after a few sessions and last for months. The treatment boosts collagen, relaxes muscles, smooths fine lines, tightens pores, and enhances facial contours and glow.

CLIENT BENEFITS

VISIBLE, NON-INVASIVE RESULTS

Unlike injections or surgery, Iceberg Cryonick Roller Mini does not damage skin, cause pain, or require downtime.

Compared to traditional massage or single-method devices, it delivers deeper and more effective results through the combination of temperature and mechanical stimulation.

Regular use reduces localized fat deposits, smooths skin texture, and improves body contours.

Non-invasive and convenient, the procedure requires no recovery time.

Additional effects include cellulite reduction, firmer skin, improved microcirculation, and a feeling of lightness after the session.
