About the Product

The VacuStar Dream treadmill combines innovative and exclusive technologies, including hyperbaric training, infrared heating, cryotherapy, pure oxygen breathing, collagen light therapy, and aromatherapy — all integrated into a single machine.

It was developed for fat reduction workouts, conditioning and rehabilitation processes.

A complete and effective solution for recovery, physical remodeling and weight reduction.

What Makes VacuStar Dream Unique?

Six technologies. One integrated system.

VacuStar Dream combines advanced fitness and wellness technologies into a single, powerful solution.

Hyperbaric Therapy

Optimizes oxygen delivery, enhances recovery, and boosts energy.

Infrared Light

Improves oxygen delivery, increases cellular metabolism, stimulates regeneration.

Cryotherapy

Cryonick system enables low temperature training for faster rehabilitation.

Collagen Light

Stimulates natural collagen production and improves skin quality.

Ozone Therapy

Helps skin regeneration and strengthens immunity.

Aromatherapy

Aromatic oils provide antibacterial effect and boost skin regeneration.

A New Generation of Training

Smarter movement. Better results.

Traditional Training

- ✕ High joint impact
- ✕ Slow visible results
- ✕ Lack of targeted body stimulation
- ✕ Not suitable for all fitness levels

The VacuStar Dream Approach

- ✓ Low-impact movement
- ✓ Hyperbaric-assisted training
- ✓ Thermal stimulation
- ✓ Fully adjustable to individual needs

Negative pressure

30 mBar

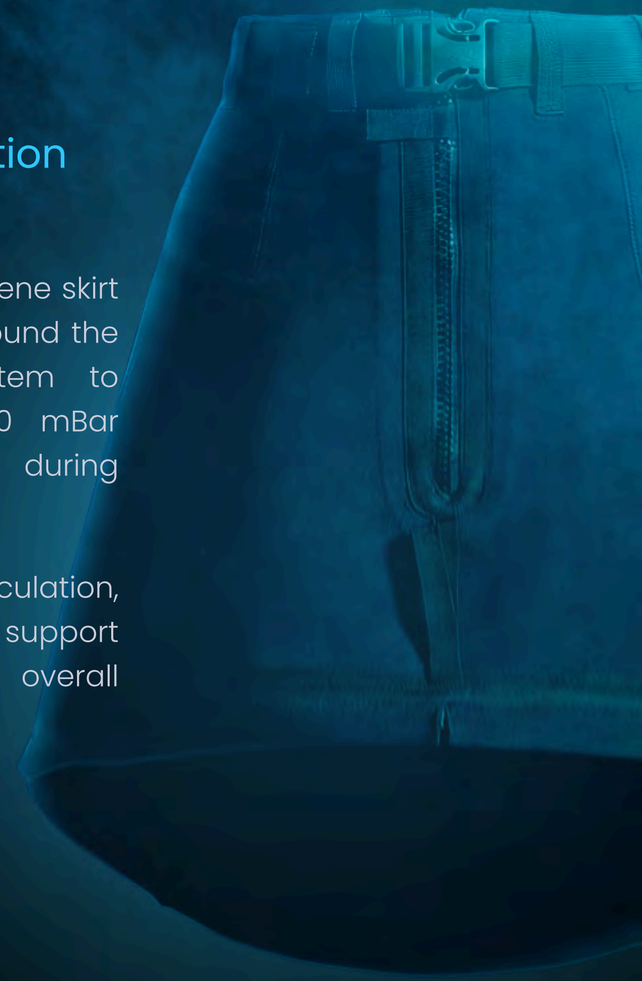

Hyperbaric Therapy

Technology Description

A specially designed neoprene skirt creates an airtight seal around the waist, allowing the system to maintain a controlled 30 mBar pressure environment during training.

This helps stimulate circulation, improve oxygen transport, support recovery, and enhance overall physiological performance.

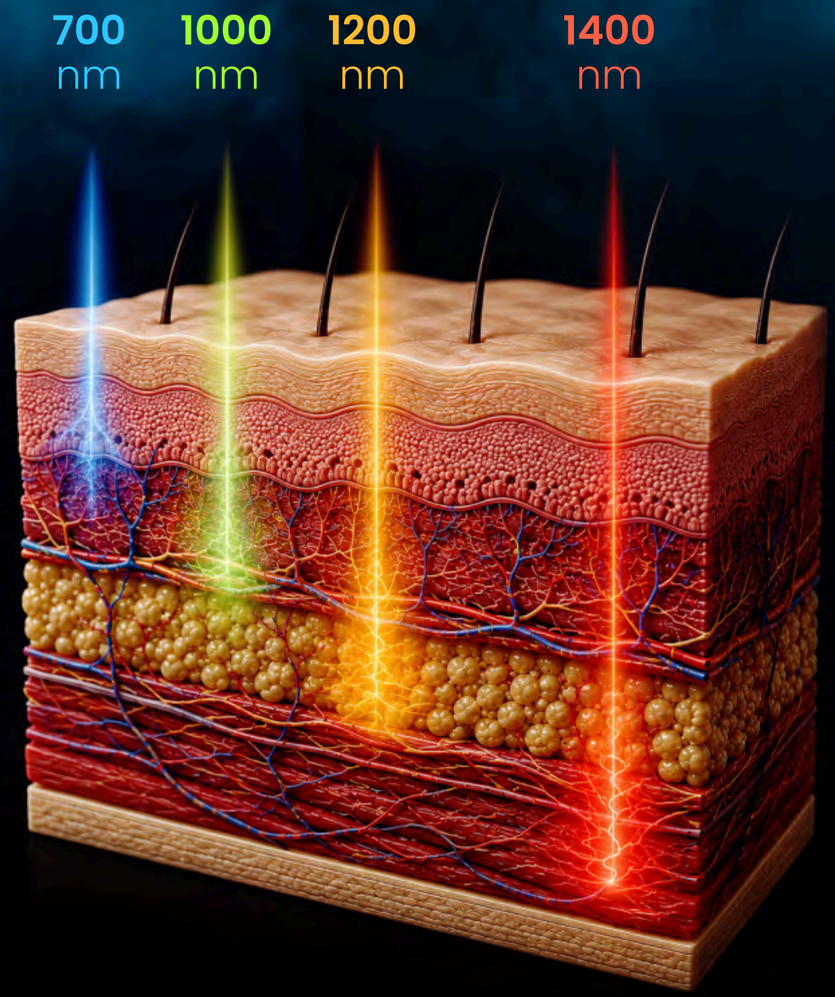

Infrared Technology

Technology Description

Infrared wavelengths between 700 and 1400 nm penetrate the skin at different depths, creating gradual thermal stimulation throughout the tissue layers. Shorter near-infrared wavelengths primarily affect the upper skin and microcirculation, while longer wavelengths travel deeper into connective tissues and muscle structures, delivering more intensive warming below the surface.

As infrared energy penetrates deeper into the body, tissue temperature rises in a controlled and uniform way. This thermal response supports blood flow, oxygen delivery, metabolic activity, and muscle relaxation while promoting natural recovery and regeneration processes within the deeper tissue layers.

Ozone Therapy

Technology Description

Ozone therapy enhances the VacuStar Dream experience by introducing activated oxygen into the treatment environment. This advanced wellness technology helps create a fresh, revitalizing atmosphere while supporting the body's natural recovery processes.

Combined with vacuum training, infrared therapy, and collagen light technology, ozone therapy contributes to an overall feeling of renewal and vitality. Users often finish their sessions feeling refreshed, energized, and ready to perform at their best.

Aromatherapy

Technology Description

Aromatherapy transforms every VacuStar Dream session into a complete wellness experience. Carefully selected essential oil aromas create a calming atmosphere, helping users relax, recharge, and enjoy a greater sense of well-being throughout their workout.

Combined with vacuum training, infrared therapy, and collagen light technology, aromatherapy enhances the overall recovery experience. The gentle diffusion of therapeutic scents helps reduce stress, elevate mood, and leave users feeling refreshed, energized, and revitalized after every session.

Cryo Technology

Technology Description

Targeted cooling airflow helps refresh the body and support recovery during or after training while maintaining a comfortable thermal balance. The cooling effect helps counteract heat accumulation and promotes a revitalizing sensation throughout the session.

It improves comfort, regulates body temperature, enhances recovery, and elevates the overall wellness and training experience.
