Introduction

ABOUT
THE PRODUCT

The Revique HaloX Longevity Capsule is a next-generation recovery and longevity platform that brings together advanced wellness technologies in one immersive, capsule-based experience. Designed to support respiratory health, cellular regeneration, nervous system balance, and deep relaxation, it represents a holistic approach to modern longevity and recovery.

By combining salt therapy, 360° red and infrared light, oxygen-enhanced aromatherapy, neuro-relaxation, and AI-driven personalization, the capsule creates a synchronized environment that works on both the body and the mind. Each session is designed to gently guide the user into a state of restoration, helping to reduce stress, improve breathing quality, and support overall vitality.

Developed for premium wellness centers, medical spas, luxury hotels, and biohacking clinics, the Revique HaloX Longevity Capsule by Vacuactivus offers a unique fusion of science, design, and technology — delivering an elevated recovery experience that fits the future of wellness.

Key Benefits

TECHNOLOGIES OVERVIEW

The Revique HaloX™ Capsule integrates multiple advanced wellness technologies into one coherent longevity ecosystem, designed to work synergistically rather than separately.

- Dry & Wet Salt Therapy
- 360° Red & Infrared Light Therapy
- Oxygen & Herbal Aromatherapy Inhalation
- Zero-Gravity Ergonomic Positioning
- Thermo-Contrast System
- AI-Driven Neuro-Relaxation
- Multi-Sensory Immersion

More about them below.

LONGEVITY CAPSULE

Dry & Wet Salt

TECHNOLOGIE
DESCRIPTION

The Dry & Wet Salt Therapy system combines micronized dry salt particles with humid saline vapor to create a therapeutic microclimate inside the capsule. This dual approach supports natural respiratory comfort by helping to cleanse the airways, improve airflow, and promote easier, deeper breathing during the session.

In addition to respiratory benefits, the saline environment gently hydrates the skin and supports natural detoxification processes. The salt-enriched air helps create a sense of freshness and lightness, contributing to both physical comfort and mental relaxation.

This technology is especially valuable in urban environments, high-stress lifestyles, and recovery-focused wellness programs, making each session feel both restorative and revitalizing.

360° Red & Infrared Light

TECHNOLOGIE DESCRIPTION

The 360° Red and Infrared Light Therapy system surrounds the body with carefully selected wavelengths that support cellular energy production and natural recovery processes. By penetrating deep into tissues, the light helps stimulate ATP activity, which is essential for regeneration and vitality.

This full-body exposure also supports circulation, muscle relaxation, and skin rejuvenation, making it an effective and non-invasive tool for longevity-focused wellness sessions.

Oxygen & Herbal Aromatherapy

REVIQUE HALO X
LONGEVITY CAPSULE

TECHNOLOGIE DESCRIPTION

The oxygen and herbal aromatherapy breathing system delivers oxygen-enriched air infused with botanical aromas directly to the user. This combination supports breathing efficiency while creating a calming and refreshing sensory experience.

Enhanced oxygen intake helps improve mental clarity and focus, while herbal aromas promote relaxation and emotional balance, seamlessly integrating breath into the recovery process.

REVIQUE HALO X
LONGEVITY CAPSULE

Zero-Gravity

TECHNOLOGIE DESCRIPTION

The ergonomically designed zero-gravity lounger positions the body in a way that minimizes pressure on the spine and joints. This posture allows muscles to relax naturally while supporting healthy circulation and effortless breathing.

By evenly distributing body weight, the lounger creates a deep sense of comfort and stability, forming the physical foundation for effective relaxation and recovery.

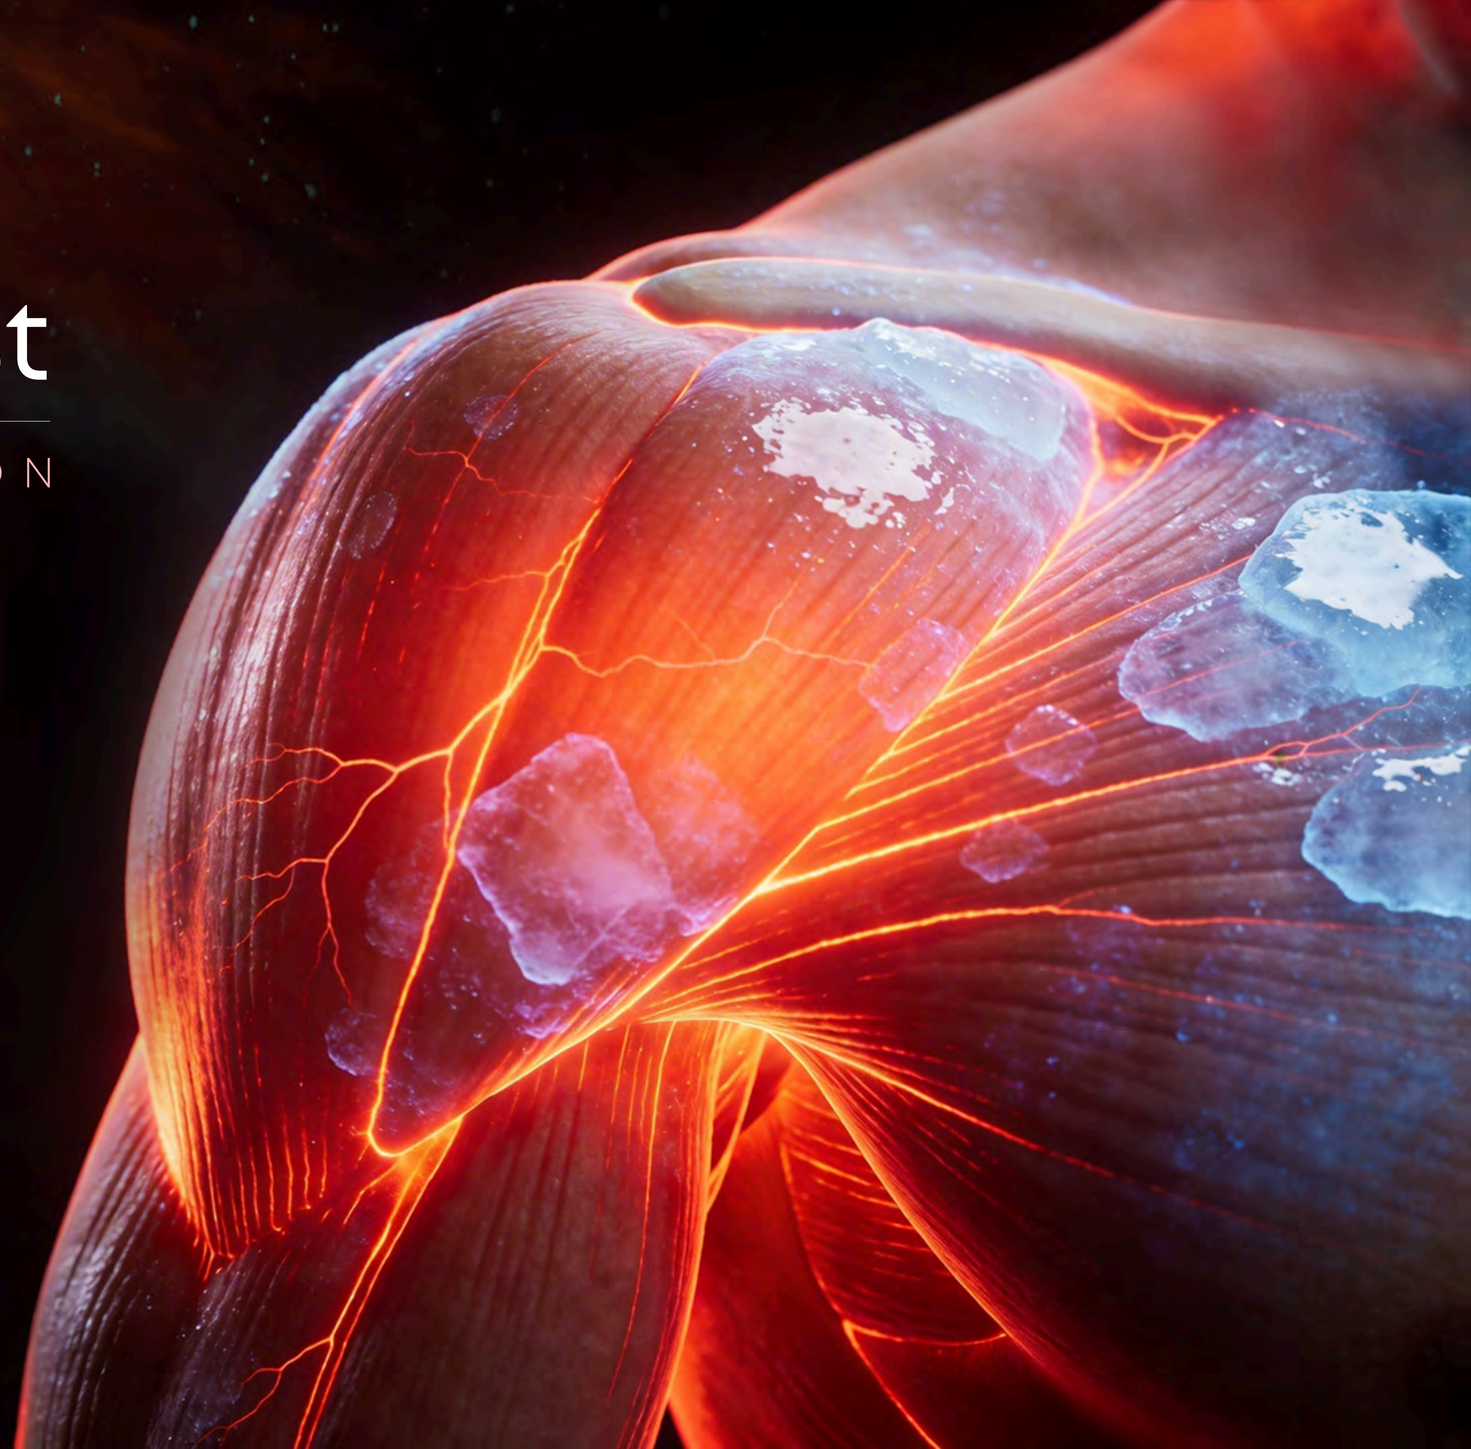

REVIQUE HALO X
LONGEVITY CAPSULE

Thermo-Contrast

TECHNOLOGIE DESCRIPTION

The thermo-contrast system combines gentle infrared heat with controlled cooling effects to stimulate circulation and support metabolic balance. Infrared warmth helps relax muscles and prepare tissues for recovery.

Cooling sensations complement this process by supporting inflammation reduction and adaptive physiological responses, creating a balanced and restorative thermal experience.

REVIQUE HALO X
LONGEVITY CAPSULE

AI-Powered Neuro-Relaxation

TECHNOLOGIE DESCRIPTION

The AI-powered neuro-relaxation system uses advanced ultrasonic technology to help calm the nervous system and reduce mental fatigue. By influencing neural pathways associated with stress and tension, it supports a state of deep mental relaxation and emotional balance.

This technology is particularly effective for individuals experiencing high cognitive load, emotional stress, or sleep disturbances. It helps quiet mental noise and supports smoother transitions into restorative states.

Integrated seamlessly into the session, neuro-relaxation enhances overall well-being and supports long-term mental resilience.

Sensory Immersion

TECHNOLOGIE
DESCRIPTION

The multi-sensory environment combines panoramic 360° visuals with ambient lighting effects to create a deeply immersive atmosphere. These elements help shift attention away from external stress and support mental relaxation.

The immersive setting enhances the effectiveness of all other technologies by aligning the mind with the body's recovery and restoration processes.
