Introduction

ABOUT THE PRODUCT

InfraStepper is an innovative low-impact fitness stepper/climber that combines cardio training, infrared heating, and red light therapy in one advanced biohacking fitness solution.

Designed to maximize calorie burning, circulation, skin health, and recovery, InfraStepper delivers efficient full-body workouts while remaining gentle on the joints.

Infrared Heating

NEAR & FAR INFRARED

InfraStepper uses infrared heating technology operating primarily in the near to far infrared spectrum (approximately 760 nm – 15,000 nm). Infrared energy penetrates deep into body tissues, helping to:

Increase blood circulation and oxygen delivery

Accelerate calorie burn and metabolic activation

Support detoxification through sweating

Relax muscles and reduce stiffness

Improve fat metabolism during low-impact exercise

Unlike traditional heaters, infrared warms the body from the inside, making workouts more effective without excessive joint stress.

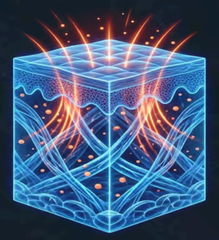

Red Light

660–880 NM THERAPY

InfraStepper is equipped with red and near-infrared light therapy, typically in the 660 nm (red light) and 850–880 nm (near-infrared) wavelengths. These clinically recognized wavelengths help:

Stimulate cellular energy (ATP) production

Improve skin tone, elasticity, and collagen support

Enhance muscle recovery and circulation detoxification through sweating

Reduce inflammation and oxidative stress

Support anti-aging and longevity benefits

Red light therapy works synergistically with exercise to support both performance and skin care outcomes.

Application

WHERE INFRASTEPPER CAN BE USED

InfraStepper is ideal for:

- Longevity studios and biohacking centers
- Wellness and recovery centers
- Medspas and aesthetic clinics
- Fitness clubs and boutique studios
- Rehabilitation and physiotherapy clinics
- Hotels, wellness resorts, and corporate wellness spaces

Personal Transformation

THE INFRASTEPPER EXPERIENCE

Mia K.
Miami, FL

I leave each workout feeling lighter, more energized, and fully present in my body.

Infra Stepper makes it easy to maintain a consistent routine that supports my health naturally.

It's not only exercise — it's self-care I look forward to every day.

InfraStepper

INFRARED & RED LIGHT FITNESS CLIMBER

Infra Stepper

InfraStepper creates an immersive, energizing environment where movement becomes a tool for transformation, recovery, and performance. A seamless fusion of climbing cardio, infrared heat, and red light therapy designed to elevate everyday fitness and total body wellness.
