Antarctica Cryobarrel

The Antarctica Barrel electric cryotherapy chamber is a cutting-edge, fully electric system used for whole-body cryotherapy. Unlike traditional cryotherapy chambers that use liquid nitrogen, electric cryotherapy chambers rely on electricity to generate and regulate ultra-low temperatures, typically between -110°C and -140°C (-166°F to -220°F). These chambers offer a more consistent and controlled cooling experience.

The Antarctica model likely stands out for its advanced features, energy efficiency, and safety measures, designed to provide therapeutic benefits like muscle recovery, reduced inflammation, pain relief, and overall well-being. It is often used in sports rehabilitation centers, spas, and wellness clinics. The electric design also makes it more environmentally friendly and easier to maintain compared to nitrogen-based systems.

The Antarctica Barrel electric cryo chamber is available in both single and dual compressor versions, offering flexibility to meet various needs. With its spacious interior, it allows for more effective and comfortable treatments. To install the chamber, a minimum space of 10m² (100 sq ft) is required.

The Antarctica Barrel S Electric Cryotherapy Chamber is a state-of-the-art, fully electric system designed for whole-body cryotherapy. Featuring a left-side standing technical box, it utilizes electricity instead of liquid nitrogen to achieve ultra-low temperatures ranging from -80°C to -110°C (-100°F to -146°F). This innovative design ensures consistent and precisely controlled cooling for an enhanced cryotherapy experience.

Renowned for its advanced features, energy efficiency, and robust safety measures, the Antarctica model is tailored to deliver therapeutic benefits such as muscle recovery, inflammation reduction, pain relief, and overall wellness. Its environmentally friendly electric system requires less maintenance compared to nitrogen-based chambers, making it a preferred choice for sports rehabilitation centers, spas, and wellness clinics.

The chamber is available in single or dual compressor configurations, providing flexibility to suit diverse operational needs. Its spacious interior ensures comfortable and effective treatments. Installation requires a minimum of 10 square meters (100 square feet) of space, along with a three-phase electrical connection and water/drain piping.

Antarctica is a fully electric cryotherapy chamber that uses electricity instead of liquid nitrogen to achieve extremely low temperatures, typically between -80°C and -110°C (-100°F to -146°F). Unlike traditional nitrogen-based chambers, which rely on liquid nitrogen for cooling, electric cryotherapy chambers utilize a cooling system similar to large freezers, employing air compression or refrigeration technology.

Key Features of Fully Electric Cryotherapy Chambers:

- Nitrogen-Free: No need for liquid nitrogen, making it safer and more convenient.
- Even Temperature Distribution: Ensures consistent cooling across the entire chamber.
- Safety: Designed with advanced safety features for peace of mind.
- Environmentally Friendly: A cleaner, greener option compared to nitrogen-based units.
- Ease of Use: Simple to operate, with intuitive controls and minimal setup.

With its affordable price and easy installation, the Antarctica model has become a best-seller in the market. These chambers are commonly used in wellness centers, sports clinics, and spas, offering effective solutions for sports rehabilitation and whole-body recovery.

The Antarctica Electric Open-Head Cryotherapy Chamber is designed for users who prefer to keep their head outside while their body is immersed in cold air. This open-head design offers comfort for those who may feel claustrophobic or want to avoid extreme cold around the face.

Key Features:

- Head Outside the Chamber: Only the body is exposed to cold air, keeping the head at room temperature.
- Electric Cooling System: Uses electricity for consistent, safe temperature control, unlike liquid nitrogen chambers.
- Controlled Cold Exposure: Provides whole-body benefits with temperatures ranging from -80°C to -110°C.
- Ergonomic Design: Adjustable for different heights, ensuring comfort with the head outside the chamber.

Benefits:

- Reduced Claustrophobia: The open design allows users to feel more comfortable and in control.
- Safety and Comfort: Keeps the head at room temperature, making it easier to breathe and tolerate.
- Full Cryotherapy Benefits: Offers muscle recovery, pain relief, improved circulation, and mental health benefits.
- User-Friendly: Easy to communicate with the technician during the session for a more personalized experience.

This chamber is ideal for wellness centers, fitness clubs, and rehabilitation facilities looking to offer effective cryotherapy treatments.

CryoStar Cryotherapy Chamber uses liquid nitrogen to rapidly cool the chamber to ultra-low temperatures as low as -170°C (-256°F), providing fast and efficient whole-body cryotherapy.

Key Features:

- Nitrogen Cooling: Uses liquid nitrogen, a non-toxic gas, for efficient cooling.
- Rapid Cooling: Achieves ultra-low temperatures quickly, ideal for short sessions (2-3 minutes).
- Open-Head Design: Many models feature an open-head design for comfort.
- Adjustable Temperatures: Precise control, usually between -140°C and -170°C.
- Compact Design: Modern and sleek, suitable for high-end wellness centers.

Benefits:

- Quick Recovery: Faster cooling helps athletes and those seeking quick recovery.
- Energy-Efficient: Uses liquid nitrogen, reducing reliance on electricity.
- Muscle Recovery: Reduces inflammation, soreness, and joint pain.
- Improved Circulation: Enhances blood flow and tissue repair.
- Mental Wellness: Boosts mood, reduces stress, and alleviates anxiety.
- Weight Loss: Stimulates metabolism, increasing calorie burn.
- Skin Health: Boosts collagen production and reduces aging signs.

CryoStar chambers are commonly used in sports rehab, wellness clinics, spas, and fitness centers for effective cold therapy.

Antarctica Whole-Body Cryotherapy Chamber combines liquid nitrogen cooling with advanced air circulation systems for a safer, more controlled cold therapy experience. It uses nitrogen to cool the air, which is then circulated around the body, ensuring even temperature distribution.

Key Features:

- Nitrogen Cooling: Uses liquid nitrogen to cool air to -110°C to -140°C (-166°F to -220°F), with no direct nitrogen exposure to users.
- Cold Air Circulation: Ensures even cooling throughout the chamber for consistent treatment.
- Whole-Body Exposure: The user's entire body, including the head, is exposed to the cold air for uniform treatment.
- Precise Temperature Control: Adjusts temperature based on user needs for a controlled cryotherapy session.
- Safety Measures: Ventilation systems prevent risks of nitrogen burns or inhalation.

Benefits:

- Even Cooling: Provides a more effective treatment with uniform cold distribution.
- Muscle Recovery: Reduces inflammation, soreness, and aids in faster muscle recovery.
- Improved Circulation: Stimulates blood flow for faster healing and recovery.
- Mental Health: Boosts mood and reduces anxiety through endorphin and adrenaline release.
- Skin Health: Enhances skin elasticity, collagen production, and reduces wrinkles.
- Weight Loss: Stimulates metabolism, increasing calorie burn after treatment.
- Comfort & Safety: Cold air is well-distributed, offering a comfortable and safe experience without direct nitrogen exposure.

The Antarctica Cryotherapy Chamber is ideal for wellness centers, spas, and sports rehabilitation clinics, offering a safe and effective cryotherapy solution for recovery, performance enhancement, and overall wellness.

Antarctica Nitrogen Cryotherapy Chamber (Open Head Version) offers whole-body cryotherapy while keeping the user's head outside the chamber, providing a more comfortable experience. It uses liquid nitrogen to cool the air, achieving temperatures between -110°C and -140°C (-166°F to -220°F).

Key Features:

- Open-Head Design: Keeps the head outside the chamber for a more comfortable and less claustrophobic experience.
- Nitrogen Cooling System: Uses liquid nitrogen to cool the air, circulating it around the body for effective therapy.
- Controlled Temperature & Airflow: Ensures even distribution of cold air for optimal results.
- Quick Cooling: Rapid temperature drop with sessions typically lasting 2-3 minutes.

Benefits:

- Reduced Claustrophobia: Alleviates discomfort from enclosed spaces, providing a relaxing experience.
- Enhanced Safety & Comfort: Keeps the head at ambient temperature, making it ideal for those sensitive to cold air.
- Improved Communication: Users can easily communicate with the technician during the session.
- Mental Well-Being: Helps reduce anxiety and improve mental focus.
- Full-Body Treatment: Ensures the body receives full benefits like muscle recovery and improved circulation.
- Longer Sessions: Comfort allows for longer cryotherapy sessions, maximizing benefits.

Applications:

Ideal for wellness centers, sports rehab clinics, spas, and fitness facilities, this open-head design combines effective nitrogen cryotherapy with enhanced user comfort and safety.

ICEBERG LOCALIZED CRYOTHERAPY MACHINE ELECTRIC

Iceberg Localized Cryotherapy Machine and LED Mask are advanced tools for targeted skin care and recovery treatments.

Iceberg Localized Cryotherapy Machine:

Designed for focused cold therapy, it targets specific areas of the body, such as injuries, inflammation, or pain management.

Key Features:

- Precise Temperature Control: Ensures effective treatment without discomfort.
- Handheld Applicators: Allow targeted cold therapy on specific areas.
- Quick Application: Sessions last 5-15 minutes.
- Non-Invasive: A non-invasive treatment for pain and inflammation.

Benefits:

- Pain Relief: Targets specific pain areas, ideal for athletes.
- Reduced Inflammation: Speeds up recovery from injuries.
- Muscle Recovery: Reduces soreness and fatigue.
- Improved Circulation: Promotes healing in treated areas.
- LED Mask:
- A skincare device that uses LED light to address various skin concerns.

Benefits:

- Skin Rejuvenation: Improves skin elasticity and reduces wrinkles.
- Acne Treatment: Clears breakouts and inflammation.
- Improved Complexion: Evens skin tone and reduces pigmentation.

Combined Use:

Using both tools together enhances results by reducing inflammation and promoting healing for faster recovery and skin rejuvenation.

ICEBERG LOCALIZED CRYOTHERAPY MACHINE 50L NITROGEN

Iceberg Localized Cryotherapy Machine uses liquid nitrogen to deliver targeted cold therapy for pain relief, inflammation reduction, and recovery.

Key Features:

- Nitrogen-Based Cooling: Uses liquid nitrogen to achieve temperatures from -110°C to -150°C for rapid, effective treatment.
- Handheld Applicator: Focuses cold therapy on specific body areas like joints and muscles.
- Adjustable Temperature: Customizable settings for optimal comfort.
- Quick Treatment: Sessions last 5-15 minutes per area.
- Portable Design: Compact and suitable for clinics, gyms, or at-home use.

Benefits:

- Pain Relief: Effective for sports injuries, arthritis, and chronic pain.
- Reduced Inflammation: Speeds up recovery and reduces swelling.
- Muscle Recovery: Alleviates soreness and fatigue.
- Improved Circulation: Enhances blood flow to treated areas.
- Non-Invasive: Safe with minimal side effects.
- Versatile: Ideal for conditions like muscle strains, joint pain, and tendonitis.

Applications:

Used in wellness centers, sports clinics, and gyms for targeted cryotherapy treatments. The Iceberg machine is an effective, non-invasive solution for pain management and recovery.

ICEBERG LOCALIZED CRYOTHERAPY MACHINE 25L NITROGEN

The Iceberg Local Cryo Machine with a 25L nitrogen capacity is a specialized device for targeted cryotherapy using liquid nitrogen. It is designed to alleviate pain, reduce inflammation, and enhance recovery by applying extreme cold to specific areas.

Key Features:

- 25L Nitrogen Capacity: Sufficient for multiple treatment sessions, ideal for clinics and wellness centers.
- Localized Treatment: Targets specific areas like joints or muscles for focused therapy.
- Handheld Applicator: Allows precise application of cold therapy to problem spots.
- Adjustable Temperature Control: Offers customizable settings, reaching temperatures as low as -160°C (-246°F).
- User-Friendly Interface: Easy-to-use control panel for operators.
- Portability: Easily moved between treatment areas.

Benefits:

- Pain Relief: Rapid relief from acute or chronic pain, popular among athletes.
- Reduced Inflammation: Speeds recovery by reducing inflammation in targeted areas.
- Muscle Recovery: Helps reduce soreness and fatigue post-exercise.
- Improved Circulation: Enhances blood flow and promotes healing.
- Non-Invasive: Safe with minimal side effects, suitable for various users.
- Quick Treatment: Sessions last 5-15 minutes for efficient use.

Applications:

Common in sports rehab clinics, physical therapy practices, wellness centers, and spas, particularly for athletes, chronic pain sufferers, and post-surgical recovery.

The Iceberg Local Cryo Machine offers effective, localized cryotherapy for pain relief, muscle recovery, and inflammation reduction.

Iceberg Cryonick Roller is an advanced device for non-invasive body contouring, skin tightening, and fat reduction using cryotherapy (cold) and thermotherapy (heat). Here's a concise overview of its features and benefits:

Key Features:

- Cryotherapy & Thermotherapy: Combines cold to freeze fat cells and heat to promote circulation and collagen production.
- Versatile Treatment: Targets areas like the abdomen, thighs, arms, and face for body contouring, cellulite reduction, and facial rejuvenation.
- Non-Invasive: No surgery or anesthesia required, with minimal discomfort and no downtime.
- User-Friendly: Digital interface to adjust temperature, duration, and target area.
- Safety Features: Monitors and controls temperatures for a safe experience.

Benefits:

- Fat Reduction: Cold therapy destroys fat cells, leading to a more contoured body.
- Skin Tightening: Heat boosts collagen, firming and tightening skin.
- Cellulite Reduction: Improves circulation and lymphatic drainage, reducing cellulite appearance.
- Quick Sessions: Treatments last 30-60 minutes with no recovery time.
- Convenience: Immediate return to regular activities post-treatment.

Applications:

Ideal for individuals seeking non-invasive fat reduction, skin tightening, and cellulite treatment, commonly offered at wellness and beauty centers.

Overall, the Iceberg Cryonick Roller offers an efficient, non-invasive solution for body contouring and skin rejuvenation.

ICEBERG
CRYONICK ROLLER

Iceberg Cryonick Roller Mini is a compact aesthetic device designed for body contouring, skin improvement, and lymphatic drainage. It combines mechanical vibration, compression therapy, and cryo-shock to deliver therapeutic benefits. Here's a concise overview:

Key Features:

- Mechanical Roller System: Stimulates circulation and lymphatic flow with rhythmic pressure and vibration.
- Vibration Therapy: Enhances blood flow and muscle relaxation.
- Customizable Settings: Adjust intensity, speed, and treatment duration for personalized sessions.
- Ergonomic Design: Targets multiple body areas like legs, abdomen, arms, and back.
- Non-Invasive: No downtime or discomfort, making it convenient for users.

Benefits:

- Improved Lymphatic Drainage: Reduces fluid retention and promotes detoxification.
- Enhanced Circulation: Boosts blood flow for better skin health and oxygen delivery.
- Cellulite Reduction: Breaks down fat deposits and improves skin texture.
- Body Contouring: Shapes and tones specific body areas.
- Muscle Relaxation: Relieves muscle tension and provides pain relief.
- Skin Firming: Promotes collagen production for tighter skin.

Applications:

Individuals seeking body contouring, skin rejuvenation, and muscle recovery. Wellness centers and spas offering advanced treatments. The Iceberg Cryonick Roller Mini is an effective, non-invasive solution for improving body shape, skin health, and overall wellness.

INFRASTAR INFRARED VACUUM BIKE

VacuStar treadmill combines cryotherapy, infrared therapy, and vacuum functions to enhance fitness, recovery, and overall health.

Key features:

- Treadmill Design: Traditional treadmill for walking, jogging, or running, suitable for all fitness levels.
- Cryotherapy: Cold therapy reduces inflammation, muscle soreness, and aids recovery during exercise.
- Infrared Therapy: Infrared light improves circulation, reduces muscle tension, and promotes relaxation.
- Vacuum System: Enhances blood flow, increases calorie burn, and improves detoxification by creating a controlled pressure environment.
- User Interface: Easy-to-use digital controls to adjust temperature, vacuum pressure, and workout intensity.
- Adjustability: Adjustable incline, speed, and settings for user comfort and varying fitness goals.

Benefits:

- Enhanced Recovery: Reduces soreness and recovery time, especially for athletes.
- Improved Performance: Enhances cardiovascular fitness with a low-impact workout.
- Increased Caloric Burn: Vacuum function boosts metabolism, aiding weight management.
- Pain Relief: Infrared therapy alleviates chronic pain and improves mobility.
- Detoxification: Supports lymphatic drainage, promoting overall health.

Applications:

Athletes, fitness enthusiasts, and those with chronic pain.
Ideal for wellness centers, sports rehabilitation clinics, and gyms.

InfraRunick treadmill with infrared and collagen lamps combines fitness with therapeutic benefits for improved overall health. Here's a concise overview of its features and benefits:

Key Features:

Treadmill Design: Standard treadmill setup suitable for walking, jogging, or running, accommodating different fitness levels. Infrared Therapy: Infrared light penetrates skin to improve circulation, relax muscles, and reduce tension. Collagen Lamps: Stimulate collagen production to improve skin elasticity and reduce wrinkles. User Interface: Digital control panel to adjust speed, incline, and therapy settings while tracking key metrics. Ergonomic Features: Adjustable settings for speed and incline, with a comfortable running surface.

Benefits: Enhanced Recovery: Infrared and collagen therapy reduce muscle soreness and accelerate recovery.

Improved Skin Health: Collagen lamps enhance skin elasticity and reduce signs of aging.

Increased Circulation: Infrared therapy boosts blood flow, supporting cardiovascular health.

Pain Relief: Infrared light alleviates chronic pain and improves flexibility.

Weight Management: Supports calorie burn and metabolic function for weight management.

Versatile: Combines cardio, skin therapy, and recovery in one device.

Applications: Ideal for fitness enthusiasts, athletes, and individuals seeking improved skin health. It's also beneficial for wellness centers, spas, and gyms offering advanced recovery solutions.

HotCold Chamber combines alternating hot and cold therapy to enhance recovery, circulation, and overall wellness. Here's a concise overview of its features and benefits:

Key Features:

- Alternating Hot and Cold Therapy: Users experience both hot and cold temperatures, improving circulation and reducing muscle soreness.
- Temperature Control: Adjustable settings for both heat (infrared or steam) and cold (cryotherapy), customizable for individual needs.
- User-Friendly Design: Intuitive control panel for easy temperature adjustments, with a spacious interior for comfort.
- Therapeutic Benefits: Offers a comprehensive wellness experience by blending heat and cold therapy in one session.

Benefits:

- Enhanced Recovery: Reduces muscle soreness and speeds up recovery after exercise or injury.
- Improved Circulation: Stimulates blood flow, aiding oxygen delivery to tissues for faster healing.
- Detoxification: Sweating from heat and lymphatic drainage from cold help detoxify the body.
- Pain Relief: Effective for conditions like arthritis, muscle strains, and chronic pain.
- Relaxation and Stress Relief: Promotes relaxation, mental well-being, and physical recovery.
- Enhanced Athletic Performance: Reduces recovery time and maintains peak physical condition.
- Applications: Ideal for athletes, individuals with chronic pain, fitness enthusiasts, and wellness centers offering advanced therapeutic treatments.

The HotCold Chamber provides a modern and effective approach to wellness by combining the benefits of hot and cold therapy.

InfraStepper™ is an advanced wellness fitness system combining a professional cardio climber with infrared heat therapy and red-light collagen technology. Designed for modern gyms, medspas, wellness studios, and longevity centers, it delivers high-intensity metabolic training while supporting recovery, skin health, and cellular regeneration.

Three Technologies.

One Intelligent Workout.

Infrared Heat Therapy Built-in infrared panels provide deep muscle warming to improve circulation, accelerate calorie burn, and enhance detoxification through active sweating. This allows faster warm-up, reduced stiffness, and improved endurance.

Red-Light Collagen Therapy

High-performance red-light wavelengths stimulate collagen production, improve skin tone and elasticity, and support cellular renewal—transforming each workout into a beauty and anti-aging session.

Climber/Stepper Training

A low-impact, full-body climbing motion activates legs, glutes, core, and upper body. Ideal for fat loss, cardiovascular conditioning, and functional strength without joint stress.

Key Benefits

- High calorie burn with minimal joint impact
- Accelerated fat loss and metabolic activation
- Improved circulation and lymphatic flow
- Skin rejuvenation and collagen stimulation
- Faster recovery and muscle oxygenation
- Ideal for wellness, biohacking, and longevity programs
- Designed for Premium Spaces
- InfraStepper™ features a sleek, modern design for high-end interiors. Adjustable infrared and red-light intensity, an intuitive digital control panel, and quiet operation make it suitable for boutique studios and continuous commercial use.

Ideal For

Fitness clubs, medspas, weight-loss studios, longevity centers, hotels, resorts, and premium wellness environments.

ROLLSTAR LYMPHATIC MASSAGE ROLLER

RollStar Lymphatic Massage Roller is a therapeutic device designed to enhance lymphatic drainage, improve circulation, and support overall wellness.

Key Features:

- Lymphatic Massage: Stimulates the lymphatic system to remove toxins and waste, mimicking manual drainage techniques.
- Ergonomic Design: Comfortable and portable for use on various body parts like legs, arms, and back.
- Adjustable Pressure: Customizable pressure for personalized comfort and therapeutic needs.
- Durable Materials: Built to last with high-quality materials.
- User-Friendly: Easy to operate with minimal setup.

Benefits:

- Enhanced Lymphatic Drainage: Reduces fluid retention and supports detoxification.
- Improved Circulation: Boosts blood flow, aiding muscle recovery and vitality.
- Pain Relief: Alleviates muscle tension and soreness.
- Relaxation: Promotes stress relief and relaxation.
- Convenience: Lightweight and portable for daily use at home or for your business.
- Applications: Ideal for athletes, fitness enthusiasts, individuals with swelling, and those recovering from surgery or injuries.

The RollStar Lymphatic Massage Roller offers an effective and convenient way to support recovery, circulation, and wellness.

REVIQUE HALOX

LONGEVITY CAPSULE

A New Standard in Human Restoration and Deep RegenerationThe Revique Halo™ Longevity Capsule is an advanced, fully integrated wellness chamber designed for premium longevity centers, biohacking studios, medical spas, luxury hotels, and private wellness suites. It combines respiratory optimization, multisensory relaxation, photobiomodulation, and AI-guided personalization in a single high-end experience.

Core Technologies

Dry & Wet Salt Therapy

A dual salt system delivers micronized dry salt for lung cleansing and immune support, plus wet salt mist for skin hydration and detoxification. This creates an optimized respiratory environment that enhances oxygen absorption and overall vitality.

Full-Body Red Light Therapy

A 360° red and near-infrared light matrix increases cellular energy (ATP), supports collagen regeneration, reduces inflammation, and accelerates tissue repair—ideal for anti-aging and recovery.

Herbal Oxygen

BreathingAn inhalation module provides oxygen-enriched airflow infused with therapeutic herbal blends to improve lung function, cognitive clarity, and stress reduction. AI synchronizes breathwork patterns based on the user's state.

Zero-Gravity

Massage CouchA natural-wood, zero-gravity couch with micro-lifting zones, soft vibro-massage, and thermal heating promotes deep muscular relaxation and spinal decompression.

Infrared Heating & Cryo Effects

Alternating infrared warmth and cooling micro-breeze stimulate circulation, reduce inflammation, and activate metabolic and thermogenic pathways.

AI Ultrasound Brain Relaxation

Ultrasonic neural modulation reduces mental fatigue, calms the nervous system, improves mood, and supports restorative sleep.

AI Virtual Health Coach

The integrated AI adjusts salt levels, light intensity, massage, temperature, breathing rhythms, and visual projections in real time, offering a fully personalized wellness journey.

Immersive 3D Projection Environment

A panoramic 360° visual system with natural landscapes, cosmic scenes, and meditative environments creates a deeply restorative sensory atmosphere.

Programs

Halo™ includes automated programs such as Deep Revive, Metabolic Boost, Cellular Rejuvenation, Stress Reset, Lung Regeneration, Detox Recovery, Sleep Optimization, and Anti-Inflammation Balance. Manual professional mode allows full customization for expert operators.

RED LIGHT COUCH

InfraCouch Red Light with a top LED panel is a therapeutic device designed for red light therapy (RLT) to enhance healing and wellness. Here's a summary of its features and benefits:

Key Features:

- Red Light Therapy: Uses red light (600-900 nm) to stimulate cellular processes, promote healing, and improve circulation.
- Top LED Panel: Delivers targeted light therapy in a comfortable reclining position, adjustable for specific or full-body treatment.
- Comfortable Design: Provides a relaxing experience for long therapy sessions.
- User-Friendly Controls: Allows users to adjust light intensity, duration, and wavelength.
- Safety Features: Includes timers and automatic shut-off for safe usage.

Benefits:

- Enhanced Healing and Recovery: Reduces inflammation and aids in muscle recovery, making it ideal for athletes and injury recovery.
- Improved Skin Health: Helps with acne, wrinkles, and psoriasis by stimulating collagen production.
- Pain Relief: Relieves chronic pain, arthritis, and muscle soreness.
- Increased Energy: Stimulates ATP production, boosting energy levels.
- Relaxation: Promotes stress relief and mental well-being during sessions.

Applications:

Athletes, individuals with chronic pain or skin issues, and anyone seeking wellness benefits. Suitable for wellness centers, spas, and clinics offering advanced treatments. The InfraCouch Red Light offers an effective, comfortable way to experience red light therapy for overall health and recovery.

SILHOUETTE SHAPER EMS

EMS SILHOUETTE
shaper

How Silhouette Shaper EMS Works and Its Benefits

The EMS device uses advanced DEPS technology (Dynamic Electromagnetic Pulse Stimulation) to induce up to 20,000 muscle contractions in just 30 minutes. This intensity surpasses traditional workouts, enabling rapid, natural muscle growth without pathological hypertrophy.

EMS not only builds muscle but also boosts metabolism in surrounding fat tissue, leading to fat reduction. The dual action of muscle toning and fat loss makes it an effective body-sculpting solution.

Benefits of EMS treatments:

- Builds muscle mass faster than traditional exercise.
- Reduces fat tissue effectively.
- Enhances body contour and definition.
- Short treatment sessions (30 minutes).
- Non-invasive and pain-free.
- Results visible within 4 weeks with regular sessions.

Silhouette Shaper EMS offers a quick, efficient way to achieve fitness and aesthetic goals.

Functions

Technology HIFEM + RF + EMS

Magnetic vibration intensity 1-13 Tesla

RF Frequency 200 MHZ

HIFEM Frequency 1-135HZ

Pulse duration 350ps

Cooling system Air cooling

PROFESSIONAL

SILHOUETTE SHAPER

The Silhouette Shaper is an advanced aesthetic device designed for body contouring, cellulite reduction, and skin tightening using vacuum therapy and rolling massage. It offers a non-invasive approach similar to LPG Endermologie for improving body shape and skin texture.

Key Features:

- Vacuum Rolling Technology: Combines suction and rolling massage to improve circulation, lymphatic drainage, and metabolism.
- Customizable Settings: Adjustable intensity, suction, and treatment duration for personalized sessions.
- Ergonomic Design: Easy to maneuver over areas like the abdomen, thighs, buttocks, and arms.
- Non-Invasive: No downtime or discomfort, offering a non-surgical alternative.
- Multiple Modes: Targets cellulite, skin laxity, and body contouring.

Benefits:

- Cellulite Reduction: Breaks down fat deposits and enhances skin texture.
- Body Contouring: Helps reshape and tone targeted areas.
- Improved Lymphatic Drainage: Reduces fluid retention and promotes detoxification.
- Enhanced Circulation: Increases blood flow for healthier skin.
- Skin Tightening: Stimulates collagen production for firmer skin.
- Relaxation & Pain Relief: Relieves muscle tension and promotes relaxation.

Applications:

Suitable for individuals seeking non-invasive solutions for body contouring, skin rejuvenation, and muscle recovery, as well as wellness centers and spas.

The Silhouette Shaper offers a versatile, non-invasive approach to improving body shape and skin health.

SILHOUETTE SHAPER

MedSaniStar Disinfection Access Station is a hygiene solution designed to enhance safety in healthcare, public spaces, and businesses by offering automated disinfection and temperature checks.

Key Features:

- Automated Disinfection: Touchless hand sanitizers and UV light sterilization for hands-free hygiene.
- Temperature Check: Integrated infrared thermometer for quick and accurate body temperature readings.
- Multi-Functional Design: Combines hand sanitization, surface disinfection, PPE storage, and temperature monitoring.
- User-Friendly Interface: Easy to operate with minimal training required.
- Durable Materials: Built to withstand high-traffic environments.
- Portable and Versatile: Suitable for hospitals, schools, offices, and public spaces.

Benefits:

- Enhanced Infection Control: Reduces transmission risk through accessible sanitization and temperature checks.
- Improved Public Confidence: Instills trust in hygiene practices.
- Convenience & Accessibility: Ensures easy access to disinfection and temperature monitoring.
- Encourages Good Hygiene Practices: Promotes regular sanitization and health monitoring.
- Customizable: Adaptable to specific hygiene needs.

Applications:

Healthcare facilities, schools, transportation hubs, retail businesses, and offices. The MedSaniStar helps maintain cleanliness, boost public confidence, and improve infection control in various environments.
