About Cryonick

Cryonick is a global manufacturer of advanced wellness, cryotherapy, and rehabilitation equipment, delivering innovative solutions for longevity, recovery, and performance.

Cryonick Wellness Technology Factory has become one of the leading players in the cryotherapy industry, supplying cutting-edge systems to fitness centers, medical facilities, and wellness spaces worldwide.

The company specializes in integrating science-driven technologies—including cryotherapy, infrared therapy, vacuum systems, and biohacking solutions—into high-performance equipment designed for real results.

Premium Wellness Equipment

Our Global Footprint

With a global presence across more than 50 countries and production and logistics hubs in the US and Europe, Cryonick provides end-to-end solutions, from product innovation to worldwide distribution and support.

Driven by a vision to redefine modern wellness, Cryonick focuses on creating premium, non-invasive technologies that enhance recovery, optimize health, and extend quality of life.

Its product ecosystem is built for the next generation of wellness spaces—where science, technology, and human performance come together.

Antarctica Barrel is a fully electric whole-body cryotherapy chamber designed to deliver deep, consistent cold exposure without the need for liquid nitrogen. Using advanced electric cooling technology, it provides a safer, more controlled environment while maintaining stable ultra-low temperatures for effective recovery, inflammation reduction, and performance optimization.

The system features a spacious, premium barrel design for full-body immersion, including the head, enhancing both comfort and therapeutic efficiency. With precise temperature control, advanced safety systems, and an intuitive touchscreen interface, Antarctica Barrel is built for high-end wellness centers, clinics, and performance facilities seeking reliable, cost-efficient, and next-generation cryotherapy solutions.

CryoStar is a next-generation whole-body cryotherapy chamber based on liquid nitrogen technology, designed for intensive recovery, performance enhancement, and wellness applications. It delivers ultra-low temperatures through an indirect nitrogen spray system, ensuring uniform cooling and maximum therapeutic efficiency while minimizing nitrogen consumption and enhancing user safety

The chamber features a modern ergonomic design with advanced control systems, including a touchscreen interface, automated programs, and integrated safety sensors. Optional thermal imaging and oxygen monitoring systems provide real-time control and visualization, making CryoStar a reliable, high-performance solution for fitness centers, clinics, and premium wellness spaces.

CryoStar Antarctica Whole Body Chamber is an advanced cryotherapy system designed for full-body exposure to ultra-low temperatures in a controlled and breathable environment. Using an indirect cooling technology with a heat exchanger, it delivers extremely cold air without direct contact with nitrogen, ensuring maximum safety while maintaining high therapeutic efficiency for recovery, inflammation reduction, and overall performance optimization.

Available in both nitrogen and fully electric configurations, the chamber offers precise temperature control, ergonomic full-body immersion, and a modern digital interface. Integrated safety systems—including oxygen monitoring and optional thermal imaging—allow real-time session control, while the spacious interior and glass design enhance comfort, making it ideal for clinics, wellness centers, and professional recovery facilities.

Antarctica Electric is a fully electric whole-body cryotherapy chamber designed to deliver ultra-low temperatures without the use of liquid nitrogen. It operates through an advanced compressor-based cooling system with a heat exchanger, producing clean, breathable cold air for safe and uniform full-body exposure. This ensures effective cryotherapy sessions with high safety standards, stable performance, and consistent thermal output.

The system is designed for simple installation and autonomous operation, featuring automated programs and precise digital control. Its energy-efficient architecture and continuous operation capability make it a reliable solution for wellness centers, fitness facilities, and recovery clinics seeking a modern, low-maintenance cryotherapy system.

ICEBERG ELECTRICAL

Iceberg Electric Cryo is a localized cryotherapy system designed for targeted cold air therapy without the use of liquid nitrogen. It operates through a high-performance electric compressor that generates ultra-cold airflow, delivering controlled exposure to specific body areas or facial zones. This enables effective recovery, inflammation reduction, skin tightening, and stimulation of microcirculation in a safe, non-invasive way.

The system is built for professional use in wellness centers, spas, and rehabilitation clinics, offering precise control via a touchscreen interface and ergonomic applicator hose. Its compact, portable design allows easy integration into any treatment environment, while optional upgrades such as LED facial masks and thermal imaging enhance treatment versatility and monitoring capabilities.

Iceberg Localized Cryo 25 is a professional localized cryotherapy system designed for targeted cold therapy on specific body areas. It uses a handheld applicator to deliver ultra-cold nitrogen vapors or chilled air directly to zones such as the abdomen, thighs, arms, or face, enabling precise treatment for fat reduction, recovery, and skin tightening without affecting the entire body.

The system is built for clinical and wellness use, combining adjustable intensity, multiple treatment programs, and an intuitive touchscreen interface. Its compact, mobile design allows easy integration into aesthetic clinics, fitness centers, and rehabilitation facilities, while built-in safety sensors ensure controlled temperature exposure during each session.

Iceberg 50L Local Cryo is a professional localized cryotherapy system designed to deliver targeted cold therapy using liquid nitrogen vapors. It operates through a built-in 50-liter nitrogen tank, producing ultra-low temperature airflow directed precisely to specific body areas. The rapid cooling effect triggers vasoconstriction followed by increased blood circulation, supporting recovery, inflammation reduction, and skin rejuvenation in a non-invasive way.

The system is equipped for professional spa, aesthetic, and rehabilitation use, allowing adjustable treatment programs for face and body applications. With a handheld precision nozzle, smart touchscreen control, and integrated safety sensors, it ensures controlled exposure and consistent performance for localized cryotherapy sessions in clinical and wellness environments.

CRYONICK ROLLER

Iceberg Cryonick Roller is a multifunctional body contouring system that combines thermal contrast therapy with mechanical lymphatic drainage massage. It uses alternating cold and heat воздействие together with a roller applicator to stimulate circulation, support fat metabolism, and improve skin tone and elasticity in a non-invasive way. The system is designed for targeted aesthetic treatments focused on body shaping, cellulite reduction, and skin rejuvenation.

The device integrates two complementary handles—one for thermal action and one for mechanical lymphatic massage—working together to enhance microcirculation, support detoxification processes, and improve tissue quality. With a smart control interface and adjustable intensity settings, it provides precise, customizable treatments for professional wellness, spa, and aesthetic applications.

Caracalla HaloX Generator brings advanced dry salt therapy and air ionization together in a compact, premium wellness system. Combining Himalayan and Dead Sea salts with organic New Zealand lavender aromatherapy, it creates a mineral-enriched breathing environment designed to support respiratory wellness, relaxation, and overall well-being.

The generator features intelligent airflow management, quiet operation, and multiple customizable programs for a seamless wellness experience. Its portable design, intuitive controls, and easy cartridge replacement make it ideal for spas, longevity clinics, wellness centers, and private spaces. HaloX transforms everyday environments into relaxing salt-air retreats, supporting stress reduction, respiratory comfort, and healthy living.
